After careful consideration, a very experienced Owner chose Cantiere delle Marche to bring his unique vision to life: **Tremenda** has been crafted precisely to his wishes and specifications and the beautifully designed and built explorer yacht touched the water in Ancona under the eyes of the owners and their family.

*"Building this fully custom explorer yacht has been both a complex and rewarding endeavor. The collaboration with Giorgio M. Cassetta has been especially productive, marking the beginning of a successful partnership that led to further collaborations and the creation of the new and incredibly successfully RAW series,"* says **Vasco Buonpensiere, co-founder and CEO of Cantiere delle Marche**. *"Tremenda encapsulates CdM's core values - vision, character, and true ocean-going capability. I want to express my gratitude to everyone involved in the completion of this remarkable explorer yacht. First and foremost, to the Owners for entrusting us with the creation of this extraordinary custom vessel; to her visionary designer, Giorgio Cassetta who pushed us to raise the bar and surpass our own limits; to **Arrow Yacht** and **FGI Yacht Group** for their invaluable contributions throughout the process and to Ian Kerr for having shared with us his solid expertise."*

Italian designer **Giorgio M. Cassetta** designed the striking lines of this 45-meter explorer yacht, marked by a graceful sheer line that extends from a nearly vertical bow to a welcoming transom, complete with a spacious beach area. In keeping with the spirit of the project, the interiors beautifully enhance the yacht's distinctive character and aesthetic.

*"I hold a deep affection for this remarkable project. The Owners had a clear and well-defined vision. Their expertise, combined with an obsessive attention to detail, proportions, functionality, and flow, made designing Tremenda a unique experience. It was an honor to design this yacht for them,"* says **Giorgio M. Cassetta**. *"The execution by CdM was outstanding, and I sincerely thank the yard for their dedication in bringing our vision to life."*

*"We are extremely satisfied with Tremenda,"* **says the Owner**. *"What impressed us most was CdM's ability to deliver the yacht through a fine-tuned teamwork, where every member played their part with skill and dedication, always striving for excellence."*

Tremenda in short:

It's difficult to capture the full impact of Tremenda in just a few words. Her bold, striking design is a testament to the power of simplicity, with geometric lines that are both rigorous and refined. This balance of minimalism and elegance commands attention, leaving a lasting impression with her confident and sophisticated presence.

Stepping aboard Tremenda, you're immediately struck by its thoughtfully designed layout. Each space is carefully proportioned, with expansive, floor-to-ceiling windows that enhance the sense of openness and connection to the surroundings. The yacht's layout optimizes guest and crew circulation, ensuring seamless movement throughout. This design not only maximizes comfort for Owners and guests but also streamlines service, enabling the crew to operate with ease and efficiency.

The yacht will host eight guests in four large suites located on the Lower deck. The Owners have reserved for themselves the forward section of the Main deck where a full beam apartment with his and her bathrooms, dressing and adjoining lounging area provide them with an area to relax in total privacy.

Smart **naval architecture and engineering** solutions by **Sergio Cutolo/Hydro Tec** makes the most out of **Tremenda's** full displacement hull. Powered by twin Man engines V12-1400, with a top speed of 14.5 knots, a range above 4000nm **Tremenda** asserts herself as a beautiful and highly efficient explorer yacht.
